 **ConnectLife**

Quick-start guide

Step 1. ConnectLife App

1.1

Download the **ConnectLife** app by scanning the QR-code to go to connectlife.io/getstarted and register.

1.2

Connect your Wine Climate Cabinet in the app by following the steps in the **ConnectLife** app.

Why ConnectLife?*

- Keeps your appliance software up-to-date.
- Set and monitor temperatures.
- Monitor humidity.
- Remote inventory management.

* The supported functionalities vary depending on the appliance and your region/country.

Proceed to step 2 to customize your Wine Climate Cabinet settings:

Set your Wine Climate Cabinet to:

- Preserve, age or serve your wine in optimal conditions.
- Change the color of the lighting to perfectly fit the room.

Step 2. Wine Climate Cabinet Settings

2.1 Temperature settings

- Set the temperature of the zone via the display in the appliance or via the app.
- Temperature settings can be set manually or according to the temperature guide.

2.2 Light settings

- Set the preferred intensity, color and temperature of the lights.
- Two light modes can be pre-set and saved: Ambient mode and Functional mode.

Now you can start placing bottles:

Step. 3 Use your Wine Climate Cabinet

- Scan your wines with the app or camera on your cabinet to add them to your digital inventory.
- Place the bottles on the shelves and use the chalkboards to write the name of your wine or wine categories.
- Store accessories in the drawer (only present in the 3-zone appliance).
- Set best to drink-moment and receive a reminder.
- Choose the exact or generic inventory management system to easily find the location of your wine.
- Use the temperature guide to find the perfect temperatures for your wine.
- Monitor humidity at all times. Humidity box helps to keep the humidity level constant.

Advantages:

- Access a wealth of information thanks to the Vivino integration.
- Optimal storing conditions for your wine.
- Get insight in temperature, vibration and humidity over time.
- Your wine inventory at hand at all times.
